FOREWORD

DR. SURESH BHOSALE

Chairman & Managing Trustee,
Krishna Charitable Trust, Karad

As we tread into the future, health sciences education is witnessing a sea-change in the way it is administered & conducted with emphasis now on new teaching methods, integration, early clinical exposure, problem solving abilities alongside acquisition of core competencies. The curriculum is undergoing transition from the traditional knowledge – based program to one that is competency – based & research oriented. Research initiatives are now integral part of the graduation program and interdisciplinary research is also being encouraged particularly in traditional Indian forms of medicine.

KIMS has taken great efforts to encourage & promote research by offering ground support for research projects in the form of seed money, pre-review by experts, experienced guides and incentives which include awards, recognition, promotion and financial rewards.

The infrastructure created for research includes dedicated research laboratories, appointment of full time research officers, addition of equipment and access to a wide network of intellectual resources.

Health care management at KIMS is quality centric with adaptation of latest techniques. The specialties in Cardiology, CVTS, Neurosurgery, Plastic & reconstructive surgery and Oncology have succeeded in bringing their services within reach of the weaker sections of the society.

Krishna Institute of Medical Sciences continues to provide leadership in health S E & health care and in the coming years seeks to establish a no. of centers excellence and promote best health practices in the region.

I congratulate the Vice-chancellor and her team in bringing an annual report that truly represents the great strides the institute has taken in enriching teaching – learning, making it is learner centric and continuously upgrading the health care delivery by adopting best practices. I am sure that the institute will live up to the expectation & aspiration of its stakeholders. MESSAGE

DR. VEDPRAKASH MISHRA
Hon'ble Chancellor

It is heartening to note that Annual Report of the Krishna Institute of Medical Sciences (Deemed University), Karad is being brought out, which covers the various **'plethora'** of happenings in the academic year 2016-17.

The report so brought out would be a **'handy referral piece'** of reading incorporating all the **'relevant informational details'**, which are of **'consequence and relevance'**.

The **'Annual Report'** also operationally turns out to be a mirror reflection of the **'happenings and doings'** by the various constituent colleges under the ambit of the University. It brings out their **'creative and committed'** activities in various domains, which pertain to teaching and learning, research, extension and also sustainable development of the society, as a whole.

An institution of higher learning cannot afford to have an **'ivory tower image'** for themselves because that would amount to they being chopped and severed off from the **'societal obligations'** and **'ground realities'** thereto.

Krishna Institute of Medical Sciences (Deemed University), Karad with its constituent units is committed to catering to the **'cause'** of society in an **'exemplary'** manner, so as to render the best that is expected and desired out of it. The Annual Report categorically brings out this very aspect of commitment of the University to the larger societal good with a sense of accountable responsibility.

I record my sincere appreciation for the Editorial Board and their team for untiring efforts in **'actualizing'** the same.

CURRICULUM DEVELOPMENT

As medicine continues to progress with new discoveries and predatory employment of new technologies, it is necessary to keep the health sciences curriculum abreast with the current clinical practice. It is therefore imperative that the curriculum takes into account the national and local needs in terms of specific competencies, leadership and communication skills while blending with the current trends in global health care management. The new curriculum initiative of the University relies on a decrease in didactic and knowledge based discourses to a newer model that creates more opportunities for self-directed, problem based learning and creative thinking skills.

Curriculum is periodically updated in order to make it socially relevant, skill oriented, knowledge intensive and commensurate with the emerging needs of students and other stake holders. However the evolved time unit by the university is observed to be 3 years with prospective effect. The curriculum is reviewed by a structured standing mechanism through broad consultation with all the stake-holders. The reason behind such a broad consultation is to procure feedback of all socially relevant issues and emerging community challenges in health care.

2. 2nd International Conference on Hazards of Lead on Human Health and Environment

22nd & 23rd October 2016

“LEADCON 2016” was organized by Krishna Institute of Medical Sciences, Deemed University (KIMSDU), Karad in association with the Indian Society of Lead Awareness and Research (InSLAR) and National Referral Centre for Lead Projects in India (NRCLPI).

Theme: **"A Step Forward to lead Safe Environment"**
 Krishna Institute of Medical Sciences Deemed University (KIMSDU), Karad in association with the Indian Society of Lead Awareness and Research (InSLAR) and the National Referral Centre for Lead Projects of India (NRCLPI) organized a unique “2nd International Conference on Hazards of Lead on Human Health and Environment” with the theme of "A Step Forward to lead Safe Environment" on 22nd and 23rd October, 2016. Indeed it was a laudable Initiative and a notable venture that had been undertaken with subtle aim and focused

purpose. This conference was organized during 4th International Lead Poisoning Prevention & Awareness week (23rd to 29th October 2016) with the intention of creating awareness towards this noble social cause and commitment.
