SCHOOL OF DENTAL SCIENCES**

PERIODONTOLOGY
(Department Name in capital bold letters)

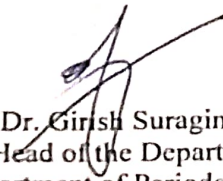

July -2026
(Month / Year)

Total no. of OPD patient for the month - 2431

Details of major clinical procedure being performed –

S/n	OPD No.	Age / Gender	Major clinical procedure	Details
1	718300	58/M	Alveoplasty done with 33, 34 region.	Full thickness mucoperiosteal flap raised, followed by bony spike reduction and contouring using micromotor. Irrigation was done and the flap was approximated and sutured back.
2	712847	45/F	Kirkland flap surgery done with 13 – 17 region.	Full thickness mucoperiosteal flap raised, followed by debridement and granulation tissue removal using curettes. Flap was approximated and sutured back in original position.
3	712847	45/F	Kirkland flap surgery done with 21 – 27 region.	Full thickness mucoperiosteal flap raised, followed by debridement and granulation tissue removal using curettes. Flap was approximated and sutured back in original position.
4	648613	60/M	Biconneogenesis Implant placement done with 46	Full-thickness mucoperiosteal flap raised, followed by placement of implant placed, flap was approximated and sutured.
5	679978	71/M	CLP With osseous reduction With 44	Full-thickness mucoperiosteal flap raised
6	67260534	34/f	CLP With osseous reduction With 11	Full-thickness mucoperiosteal flap raised
7	695037	23/M	CLP With osseous reduction With 16	Full-thickness mucoperiosteal flap raised

8	70424	42/F	CLP With osseous reduction With 26	Full-thickness mucoperiosteal flap raised
9	670457	28/M	Alveoloplasty done with 36	Full thickness mucoperiosteal flap raised, followed by bony spike reduction and contouring using micromotor. Irrigation was done and the flap was approximated and sutured back.
10	701198	47/F	Kirkland flap surgery done with 21 – 27 region.	Full thickness mucoperiosteal flap raised, followed by debridement and granulation tissue removal using curettes. Flap was approximated and sutured back in original position.
11	657893	52/F	Kirkland flap surgery done with 31 – 38 region.	Full thickness mucoperiosteal flap raised, followed by debridement and granulation tissue removal using curettes. Flap was approximated and sutured back in original position.
